

User Acceptance Testing (UAT) Template

Date	3 October 2026
Team ID	
Project Name	Automated Network Request Management System
Maximum Marks	

Project Overview:

Project Name: Automated Network Request Management System

Project Description: An end-to-end automated Service Catalog solution on ServiceNow. Employees raise network requests (Wi-Fi, VPN, static IP) through the Network Request catalog item; Catalog UI Policies validate the form, Flow Designer creates a DAT... record in u_database_tables, routes the manager approval and sends automated emails (sys_email).

Project Version: 1.0

Testing Period: 1 October 2026 to 3 October 2026

Testing Scope:

Features: Network Request catalog item (7 variables and Requester Information variable set), Catalog UI Policy (Hide/Show of ID field), custom table u_database_tables with DAT auto-number, Flow Designer flow (create record, send email, ask approval, update record), email notifications (sys_email) and request tracking (REQ / RITM) in the Service Portal.

User stories / requirements: USN-1 to USN-22 of the Project Planning document (catalog item, form validation, workflow automation, notifications, tracking, testing).

Testing Environment:

URL/Location: <https://dev393606.service-now.com/sp> (Service Portal) and Workflow Studio for the Network Request flow

Credentials (if required): Tested with the System Administrator account of the developer instance (credentials not included in this document).

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Open the Network Request catalog item	1. Open the Service Portal. 2. Search 'network request'. 3. Open Network Request.	Catalog item form opens	Search returned Network Request; the form opened with Requested For and Requester Information.	Pass
TC-002	Select requester on behalf of	1. Open the Opened on behalf of drop-down. 2. Pick a user.	User list shown and selectable	Drop-down listed users with email IDs and a user could be selected.	Pass

TC-003	Catalog UI Policy present on the catalog item	1. Open the catalog item in the platform. 2. Check Catalog UI Policies tab.	Policy 'Hide/Show of ID field' is active	1 active Catalog UI Policy 'Hide/Show of ID field' found.	Pass
TC-004	Submit a request with valid data	1. Enter Mobile Number, Type of Connection, Total Amount (5000), Mode of Payment (UPI) and Address. 2. Click Order Now.	Order Confirmation shown	Order Confirmation displayed and the order was placed.	Pass
TC-005	Request number and tracking	1. After ordering, open Request Summary.	REQ number, stage and delivery date shown	REQ0010004 shown with stage Request Approval and estimated delivery date.	Pass
TC-006	Flow creates record in u_database_tables	1. Open the Network Request flow. 2. Check action 2 and its field mapping.	Create Database Tables Record runs for each request	Action mapped Customer Address, Mobile Number, Mode of Payment, Total Amount and Type of Connection; later steps (email, approval) ran for every request.	Pass
TC-007	Request created email	1. Open System Logs > Emails. 2. Filter Created on Today.	'Request REQ... was created' email for each request	Emails found for REQ0010002, REQ0010003 and REQ0010004.	Pass
TC-008	Approval and record update	1. Check the Emails log. 2. Check the Approved branch of the flow.	'Request REQ... was approved' email and record updated	Approved emails found for all 3 requests; Approved branch updates the Database Tables record.	Pass
TC-009	Dynamic HTML email	1. Open the approval email. 2. Use Preview HTML Body.	Email shows request details	Preview shows 'Your request was approved', RITM0010003 and Network Request.	Pass
TC-010	Negative test: submit with missing mandatory details	1. Leave mandatory fields empty. 2. Click Order Now.	Error shown and request not placed	Not captured in the recording.	Pending

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Type of Connection = New still shows the 'Enter your existing Id' field on the form.	1. Open Network Request form. 2. Keep Type of Connection = New. 3. Check the ID field.	Medium	Open	Verify the On load and Reverse if false settings of the 'Hide/Show of ID field' UI policy.
BG-002	Notification emails are addressed to sample addresses (admin@example.com).	1. Open System Logs > Emails. 2. Check the Recipients column.	Low	Open	Developer-instance sample data; configure real recipients and SMTP before production.

Sign-off:

Tester Name:

Date: 3 October 2026

Signature:

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

Test Evidence (Screenshots from the project run):

The screenshot shows the 'Network Request' form in the ServiceNow interface. The form includes fields for 'Name' (filled with 'abraham.lincoln'), 'Mobile Number' (filled with '90909090'), 'Type of Connection' (radio buttons for 'New' and 'Existing'), 'Enter your existing id', 'Total Amount', 'Mode of Payment' (radio buttons for 'UPI' and 'CARD'), and 'Address'. A sidebar on the right shows 'Quantity: 1', 'Delivery Time: 2 Days', and buttons for 'Add to Cart', 'Save as Draft', and 'Order Now'. The top navigation bar includes links for Knowledge, Catalog, Requests, System Status, Cart, Tours, and System Administrator.

Fig 1: Network Request form (TC-001 to TC-004)

The screenshot shows the 'Catalog UI Policy' configuration page for 'Network Request'. The page includes a search bar, a table of related catalog items, and a table of catalog UI policies. The table has columns for 'Short description', 'Variable set', 'Conditions', 'Reverse if false', 'On load', 'Inherit', 'Updated', and 'Order'. The first row shows a policy for 'visible/hide of ID field' with an empty variable set, conditions set to 'true', and an order of 100.

Short description	Variable set	Conditions	Reverse if false	On load	Inherit	Updated	Order
visible/hide of ID field	(empty)	true	true	true	false	2026-10-02 02:37:44	100
